

SIZE 32l / 30l (S) **WEIGHT** 1340g / 1320g
MINIMAL WEIGHT 1280g / 1260g
BACK LENGTH Regular / Short (S)

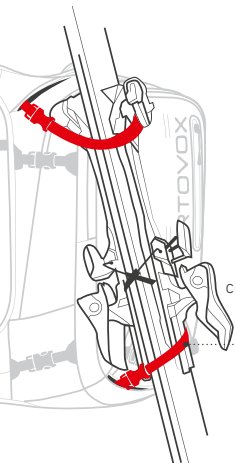

SAFETY COMPARTMENT

Access to the compartment is marked with the red zipper pullers. Probe and shaft receiver are marked with icons. Fasten the shovel, with the sharp edge up, on the front of the backpack.

HAUTE ROUTE 32 / 30 S

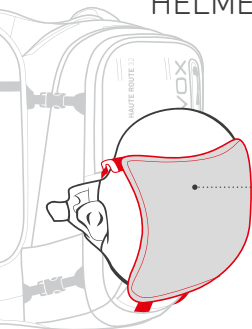

R

D-SKIFIX

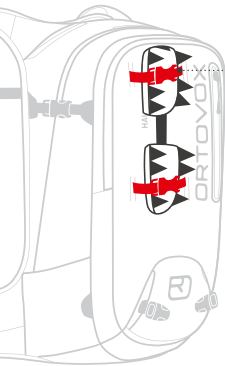

Push the ski through the large loop hidden in the small compartment under the icon panel. Secure with loop, hidden in small compartment above the left shoulder strap.

HELMET FIXATION

Helmet net is stored in the foremost compartment (ORTOVOX icon). For fixation use small loops on the sides.

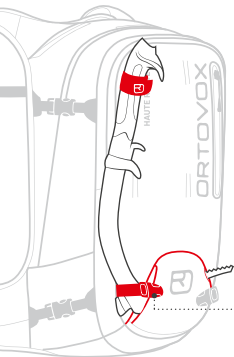

CRAMPIONS FIXATION

Fix the crampons by fitting the two additional straps (located in the middle compartment) through the small slots at the front.

ICE AXE FIXATION

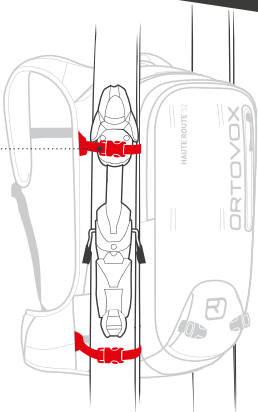

There is space for two ice axes.
Place the pick of the axe into the icon compartment and fix it with the buckles.
Then attach the shaft by fitting the additional velcro strap (found in the middle compartment) through the slots on the front panel.

A-SKIFIX

Classic side
ski fastener.

SNOWBOARD AND SNOWSHOE FASTENER

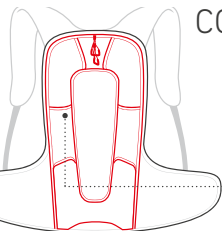

Use the two
separate straps
(located in the
middle compart-
ment) and fix them
at the male buckle
parts of the lateral
compression
straps.

COMPRESSION STRAPS

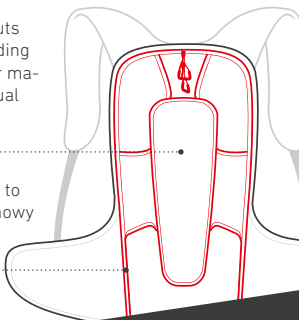

Can be used for gear attachment, ski fixation or as compression straps.

O-FLEX FRAME AND BACK OPENING

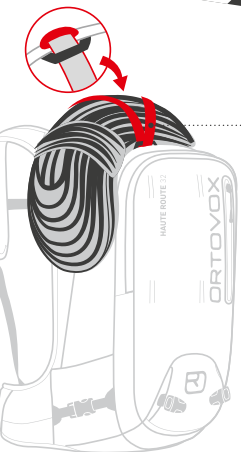

Two horizontal aluminium struts inside the padding can be bent for maximum individual adjustment.

Perfect access to your gear in snowy conditions.

R

ROPE FIXATION

Use fixation strap (located in the middle compartment) and fit two half moon hooks (one is hidden in the little top compartment) on the upper side of pack. Open the buckle, catch the loop above middle compartment, close the buckle again and tighten the strap.

HYDRATION SYSTEM COMPATIBLE

Secure the drink bladder into the slot and with the clip at the back system, then lead the tube through the outlet on top and fasten it on one of the shoulder straps.
