

Technical Data Sheet

Probe Extension Steel

The PROBE EXTENSION STEEL adds 40cm to compatible ORTOVOX steel avalanche probes. It provides a practical solution for probing in exceptionally deep snow. Made of robust steel, the extension is designed for reliable use in demanding rescue operations and can be attached quickly when additional probing length is required.

Key Features

- **41.6cm steel extension:** Increases the probing reach of compatible ORTOVOX steel probes.
- **Robust steel construction:** Designed for reliable use in demanding avalanche rescue operations.
- **Easy integration:** Designed for quick and straightforward attachment to compatible probes.

Technical Specifications

Product Type	Probe extension
Material	Steel
Length / Pack size	41.6cm
Weight	80g
Diameter	12.7mm
Number of Segments	1
Compatibility	Extendible ORTOVOX steel avalanche probes.
